Exam : **2V0-651**

Title : VMware Certified Professional
6 - Desktop and Mobility Beta

Vendor : VMware

Version : DEMO

NO.1 An administrator has completed upgrading the View pods in two datacenters to Horizon 6. To facilitate the new Continuity of Operations initiative, the administrator needs to implement global entitlements via the new Cloud Pod Architecture.

Which capability of the administrator's current environment is incompatible with Cloud Pod Architecture?

- A. Dedicated Full Clone Pools
- B. HTML Access
- C. ThinApp Entitlements
- D. Persona Management

Answer: B

NO.2 An administrator needs to install View Composer.

The current environment uses a vCenter Server appliance and four ESXi hosts.

Which two steps should the administrator take to complete the installation? (Choose two.)

- A. Log in using a domain user account with local Administrator privileges.
- B. Install the View Composer server on the vCenter Server.
- C. Log in using Administrator@vsphere.local.
- D. Install the View Composer server on a standalone Windows server.

Answer: A,D

NO.3 While deploying a View desktop pool, an administrator determines that the virtual desktops remain at a status of Customizing.

In the debug-timestamp.txt log file of the View Agent, the administrator finds the error message:
Debug - Unable to connect to JMS

Server.com.vmware.vdi.agent.messageserver.Jmsmanager.a(SourceFile:238)

javax.jms.JMSEException:Unable to create a connection to:[ServerEntry, hostname, port=4001]

What should the administrator do to troubleshoot the connection problem?

- A. Verify that the View Composer Guest Agent Server service is set Started on the virtual desktops.
- B. Verify that the View Agent can communicate with the View Connection Server over port 4001.
- C. Verify that the View Connection Server can resolve the DNS name of the vCenter Server.
- D. Verify that the View Security Server can establish a connection using the AJP13 protocol over port 4001.

Answer: B

NO.4 An administrator is installing RSA SecurID authentication for a View implementation and needs to force the RSA and Active Directory user names to match during authentication.

Which option should the administrator select to meet the requirement?

- A. enforce 2-factor and windows user name matching
- B. synchronize 2-factor and windows user name matching
- C. enforce securID and windows user name matching
- D. synchronize securID and windows user name matching

Answer: C

NO.5 An administrator needs an Active Directory service account to use for Quickprep.

The organization's policies do not allow the service account to create new computer accounts in Active Directory.

Pre-existing computer accounts must be reused.

Which three Active Directory permissions are required for the service account? (Choose three.)

- A. List Contents
- B. Read All Properties
- C. Delete Computer Object
- D. Reset Password
- E. Write All Properties

Answer: A,B,D

NO.6 An administrator is creating a full clone desktop pool for 150 users.

All of the desktops will be accessed at 9:00 a.m. on weekdays.

The administrator needs to minimize the effect on storage performance during simultaneous desktop logins.

What step can the administrator take to help meet the requirement?

- A. Enable View Storage Accelerator
- B. Enable Space Efficient Sparse Disks (SEsparse)
- C. Redirect disposable files to a non-persistent disk
- D. Select a separate datastore for the replica and OS disks

Answer: A

NO.7 An administrator is installing Mirage. During installation an error message is displayed.

The error message indicates that the database cannot be configured due to insufficient permissions.

What is the most likely problem with the database user account?

- A. It does not exist.
- B. It is missingdb_creatorprivileges.
- C. It does not have a password configured.
- D. It is missingALTER TABLEpermissions.

Answer: B

NO.8 An administrator is planning the capture of a reference machine for two departments:

Finance and Information Technology.

Which two applications should the administrator include in the common base layer?

(Choose two.)

- A. Finance Accounting Application
- B. Anti-Virus software
- C. Admin Script Editor
- D. VPN Software

Answer: B,D
